

# SUPPORTING THE DIGITAL TRANSFORMATION OF SOCIAL ECONOMY ORGANISATIONS DIGI:GO

## ABOUT THE PROJECT

The Covid-19 pandemic had and continues to have repercussions in all social and economic areas and also in the educational activity. In the last two years, we have seen the sudden closure of educational institutions and the forced transition to distance learning.

And as a consequence, numerous sectors have suffered to adapt and find new ways to overcome the educational and social crisis.

The idea of the DIGI: GO Project arose from this problem.

The DIGI: GO project aims to support adult educators, VET (Vocational Education and Training) providers, teachers and other professionals from the social and education field in the incorporation of online tools to enhance teaching and learning; how to use educational technologies to deliver training in hybrid environment, and how to use the best pedagogical approaches that will prepare them to effectively deliver a tailor-made training programmes with their target-groups.

## KICK OFF MEETING, LISBON

The consortium met in Lisbon on February 24 for the kick off meeting to launch the DIGI: GO Project. The partners had the opportunity to discuss the project's objectives and steps, as well as to clarify tasks and responsibilities for the next steps.

## MEET THE TEAM

**iserundschmidt GmbH** is the coordinating partner of the project. iserundschmidt GmbH is an agency specialising in science and knowledge communication located in Germany.

**The Innovation Hive** is a private non-profit organization, located in Larissa, Greece. The organization is active in the fields of business and social Innovation.

**The Square Dot Teams** is an SME located in Leuven, Belgium and aims to develop research and provide policy advice with the view to enrich public policy with tailor-made, innovative and socially responsible solutions.

**Exeo Lab**, based in Basilicata, Italy, focuses particular attention on the global challenge related to the digital transition of SMEs, NGOs, and public institutions, accompanying them in a process of change management, redesigning the organizations, rewriting the productive processes, and improving the organizational performances.

**Proportional Message**, based in Lisbon, Portugal, is a non-governmental organization that supports people with disadvantaged backgrounds through the development of humanistic education values.

**CARDET**, It is one of the leading research and development centres in the Euro-Mediterranean region, with global expertise in project design and implementation, capacity building, and e-learning.

## PROJECT RESULTS

The DIGI: GO proposes a wide range of activities that will be implemented throughout the 24 month project lifecycle. The results of the project include:

- Toolkit of Digital Skills Development
- Service Training Programme
- E-learning platform
- Policy Paper
